BRINGING YOUR SPACE TO LIFE

4 WAYS TO USE **ARTIFICIAL TREES** IN YOUR HOME

ARTIFICIAL TREES ARE SOME OF THE BEST LOW-MAINTENANCE GREEN DECOR PIECES YOU CAN USE FOR YOUR SPACE, INSIDE OR OUTSIDE.

CHECK OUT THE **4 TOP WAYS** TO USE **FAUX TREES** HERE:

1 **FILL EMPTY CORNERS**

Prop up a realistic faux tree in a lonely and empty corner inside or outside your home. Put the tree in an intricate pot to improve the aesthetics and complement the rest of your decor.

2 **LINE THE POOL**

Use a few artificial trees next to each other to frame your poolside and provide the green decor your space has been missing. Make sure to get UV-resistant faux trees to avoid fading.

3 **FRAME THE DOOR**

Position 2 of the same artificial trees on each side of your front or patio door to frame it. This focuses the attention on your entryway and softens the transition from outdoors to indoors.

4 **LINE A PATHWAY**

Highlight a pathway in your garden or leading up to your front door with a row of identical artificial trees. Space them out to ensure they effectively guide the visitor through the space.

NOW WHAT?
